

Assignment no:9

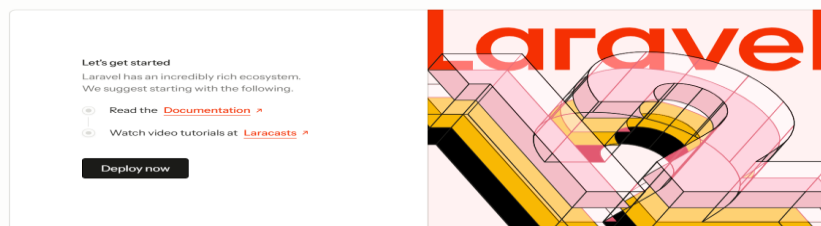

- ✓ First, open the htdocs folder of XAMPP in Command Prompt.
Path:C:\xampp\htdocs
- ✓ Run the following command in CMD to create a new Laravel project named bhavesh:
- ✓ `laravel new bhavesh`
- ✓ Select none for Starter Kit and 0 for Testing Framework.
- ✓ Select no for AI-assisted coding, choose mysql as the database, and select yes for default database migration.
- ✓ Select yes for ignore scripts option.
- ✓ Execute the following commands:
`cd bhavesh`
`composer run dev`
- ✓ Open the browser and search <http://localhost:8000>

```
Application ready in [bhavesh]. You can start your local development using:
→ cd bhavesh
→ composer run dev

New to Laravel? Check out our documentation. Build something amazing!

C:\xampp.php\htdocs>cd bhavesh
C:\xampp.php\htdocs\bhavesh>composer run dev
> Composer\Config::disableProcessTimeout
> npx concurrently -c "#93c5fd,#c4b5fd,#fdb474" "php artisan serve" "php artisan queue:listen --
[vite]
[vite] > dev

localhost:8000

- ✓ Generate a new view file by executing the following command:
`php artisan make:view home`
- ✓ Now, open the `web.php` file and add a route for the home page.
- ✓ Go to the `home.blade.php` file and write the necessary HTML code inside it.
- ✓ Launch the browser and visit:

<http://localhost:8000/home>

The screenshot shows a code editor with two tabs: `web.php` and `home.blade.php`. The `home.blade.php` file contains the following HTML code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Document</title>
7 </head>
8 <body>
9   <h1>माती खान्देशची, जिद्द मराठ्यांची, आणि future codingचं</h1>
10 </body>
11 </html>
```

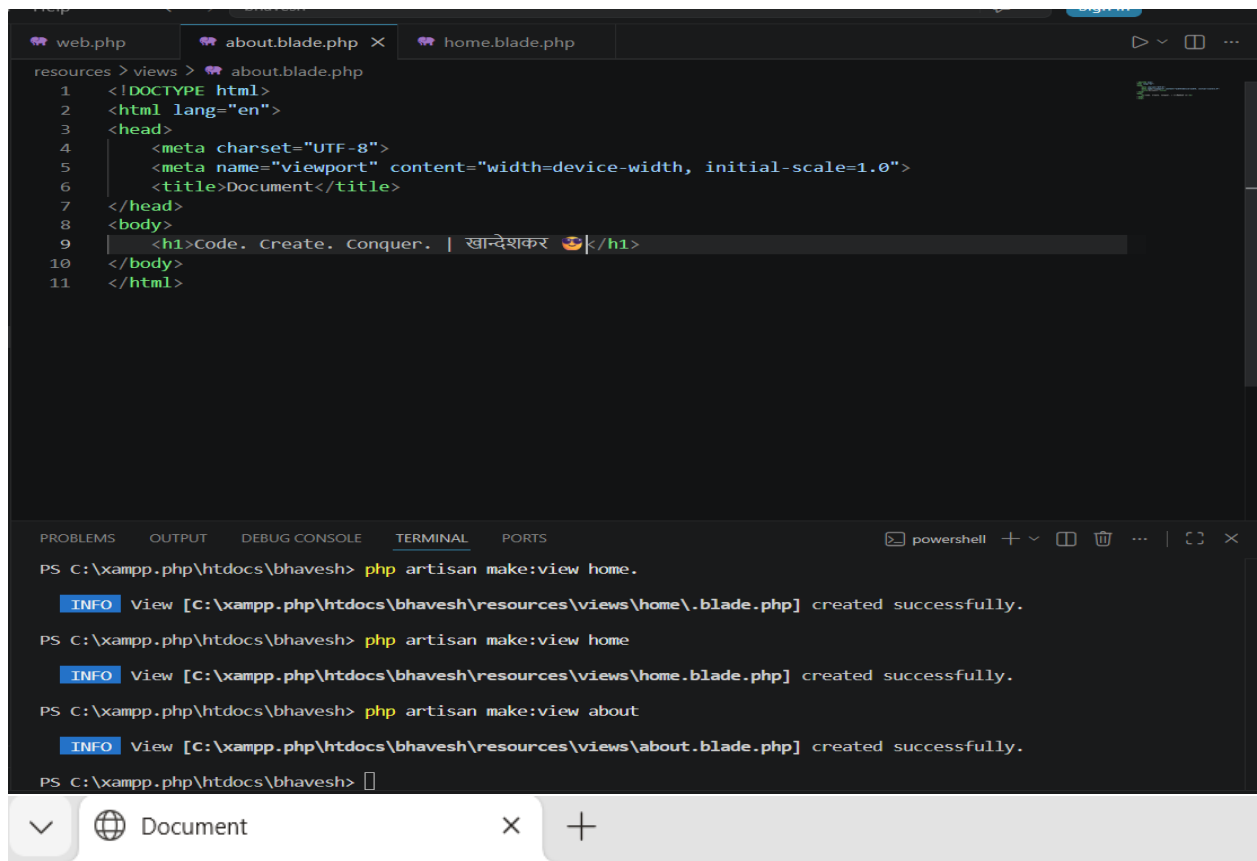

Below the code editor is a terminal window showing the execution of the command `php artisan make:view home`. The output indicates that the view file was created successfully:

```
PS C:\xampp.php\htdocs\bhaves\> php artisan make:view home.
INFO View [C:\xampp.php\htdocs\bhaves\resources\views\home.blade.php] created successfully.
PS C:\xampp.php\htdocs\bhaves\> php artisan make:view home
INFO View [C:\xampp.php\htdocs\bhaves\resources\views\home.blade.php] created successfully.
PS C:\xampp.php\htdocs\bhaves\>
```

At the bottom, a web browser window is open with the address `localhost:8000/home`. The browser displays the rendered HTML content:

माती खान्देशची, जिद्द मराठ्यांची, आणि future codingचं

- ✓ Generate a new view file by executing the following command:
php artisan make:view about
- ✓ Now, open the web.php file and add a route for the about page.
- ✓ Go to the about.blade.php file and write the necessary HTML code inside it.
- ✓ Launch the browser and visit:
<http://localhost:8000/about>

The screenshot shows the Visual Studio Code editor with the file `resources > views > about.blade.php` open. The code in the file is as follows:

```
1 <!DOCTYPE html>
2 <html lang="en">
3 <head>
4   <meta charset="UTF-8">
5   <meta name="viewport" content="width=device-width, initial-scale=1.0">
6   <title>Document</title>
7 </head>
8 <body>
9   <h1>Code. Create. Conquer. | खान्देशकर 🤖</h1>
10 </body>
11 </html>
```

Below the editor, the TERMINAL panel shows the following commands and output:

```
PS C:\xampp.php\htdocs\bhavesh> php artisan make:view home.
INFO View [C:\xampp.php\htdocs\bhavesh\resources\views\home.blade.php] created successfully.
PS C:\xampp.php\htdocs\bhavesh> php artisan make:view home
INFO View [C:\xampp.php\htdocs\bhavesh\resources\views\home.blade.php] created successfully.
PS C:\xampp.php\htdocs\bhavesh> php artisan make:view about
INFO View [C:\xampp.php\htdocs\bhavesh\resources\views\about.blade.php] created successfully.
PS C:\xampp.php\htdocs\bhavesh>
```

Code. Create. Conquer. | खान्देशकर 🤖
